CASTELL D'AIXA

approx. 12 km, 500 m ascent, 4.5 hrs.
hard ant-clockwise circuit to the highest point in the Sierra Solana.

This is a long, hard walk and is best done by a fit party on a cool, cloudy but clear day, for there is little shade. Avoid the valley end descent for the path is badly eroded and not safe. Summit views are extensive, but there are no castle ruins!

This route, starting at Font d'Aixa, avoids the re ascent on the return to Pedreguer.

COSTA BLANCA WALKS MAPS
LA SOLANA - Castell d'Aixa Circuit

This is a long hard walk! Approx. 15km, 550m ascent, 5½ hrs. Routefinding tricky in places. You need to be fit and to enjoy a challenge!
MONTGO - Javea

approx. 8 km, 550 m, 4 hrs. A hard 'there and back' route.

From Benidorm take the N332 to Gata de Gorgos and turn R. onto the CV 734 for Javea. As you reach Javea, on a dual carriageway, turn at the 2nd mini-roundabout by the petrol station, doing a U turn. Then bend R. and uphill (for Denia) to the top.

The Montgo is an imposing mountain, an isolated massif rising abruptly from the Plano (plateau) between Denia and Javea. The climb is an unrelenting slog up a zig zag path which ends at the foot of a rocky ridge that many find challenging.
